

# Getting a Hearing Aid

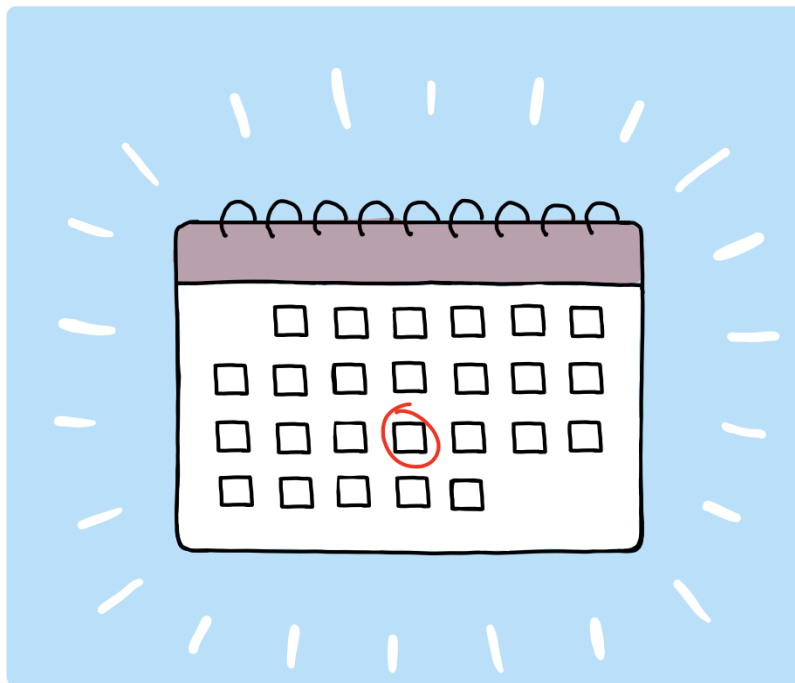

This is a story about getting a hearing aid!  
I'm getting my hearing aid to help me hear sounds.

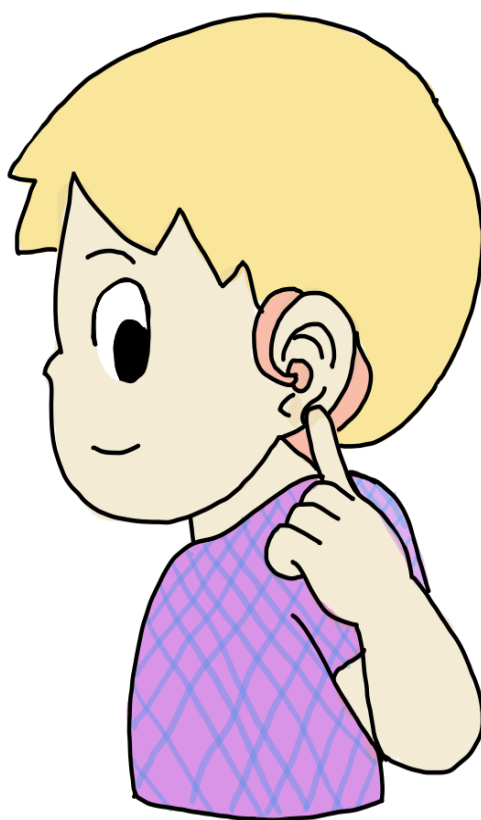

They will make a mold of my ear so that my hearing aid fits.

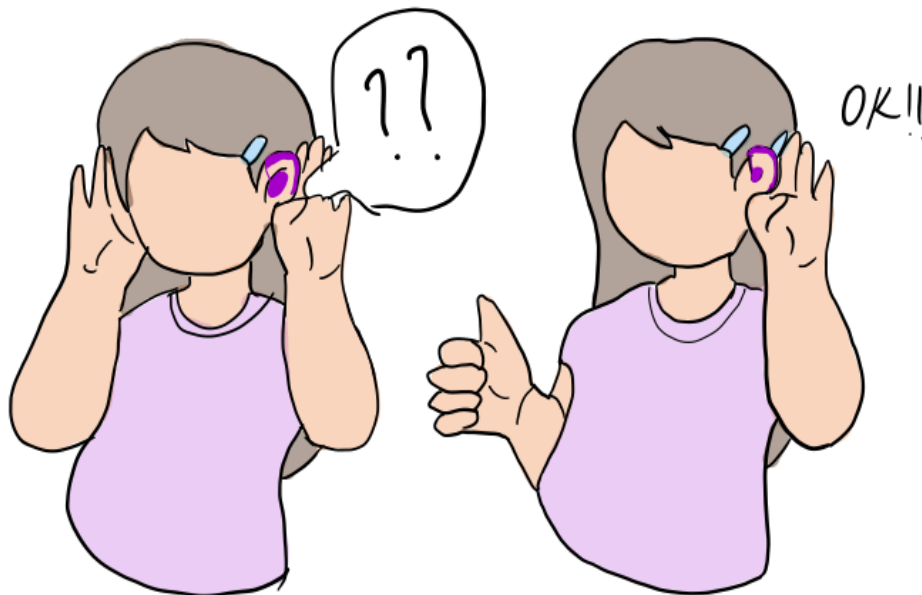

It will take about four weeks for my hearing aid to arrive.

Someone will help me try on my hearing aid to make  
sure that it fits.

Someone will turn on my hearing aid and things will sound different.

Someone will set the volume for what I need to hear  
sounds around me.

It might take me time to adjust to all the new sounds I  
am hearing, and that is ok!

Someone will show me and my family how to take care of my hearing aid.

I did a great job learning how to wear my hearing aid!
