

## Speech Therapy

Today I am going to speech therapy! Speech therapy helps me communicate what I am trying to say so others understand me.

My speech therapist might say a word or make a sound and ask me to repeat it.

If I'm having trouble talking, that's no problem! We might try making faces, writing, or drawing to show what I'm feeling.

At the end of my visit, my speech therapist may give me some homework so I can practice before next time!

At the end of my speech therapy session I may even get a prize for all of my hard work!

I did a great job learning about speech therapy today!
